

AMMANN

New from Ammann: Ammatex[®] filter bags.

For high durability and cleaner air.

Quality at
good prices.

For high durability
and cleaner air

New, and only from Ammann: Ammatex[®] filter bags.

Ammatex[®] is the new material for your filter – an innovation from the Ammann Group. The replacement areas are: Ameco Filter, Lühr and BMD.

Your benefit:

- Quick and easy to install due to a high accuracy of fit
- Suitable for all fuels
- Long life span – up to twice the lifetime
- Very good price to performance ratio
- Low emission values due to a higher thickness and good filter characteristics.

A comparison is worth it! Phone us!

Filter Monitoring

Monitor your dust emissions and reduce the maintenance with filter guards.

You can automatically, reliably and safely monitor the air purification with the simple upgrade. How? The filter guard informs you, whether visually or by sound, if your filter exceeds the acceptable emission value.

So you are to stick to the official emission values stipulated at all times!

Your benefit:

- Emission measurement and filter monitoring in one.
- Cost efficiency due to a clearer error location
- Avoidance of a loss of production

Upgrade today – it's worth it!
